VPS SMART LOCKBOX

MANAGE YOUR RISK AND YOUR COMPLIANCE

BLUETOOTH ENABLED HIGH SECURITY KEY STORAGE BOX

Minimise key holding issues and maximise operational efficiencies with the Smart Lockbox. The only key safe approved for commericial use with LPS 1175C1 rating, the Smart LockBox puts you in complete control, allowing you to provide safe access to keys or keycards for property inspections, contractors and facilities management. Only authorised users gain access through their smartphone or with a code, without the need for a key handover. Insurer approved and police accredited, the Smart Lockbox provides an electronically sealed and secured way of storing keys, fobs and keycards outside access doors, reducing the code management security issues of mechanical key safes.

AT A GLANCE:

- **Police Accredited and insurance compliant - the only commercial graded key box with C1 accreditation, the highest possible level**

- **Bluetooth and PIN code access for complete security**

- **Geo-Fencing enables recording of time accessed and attendance**

- **Lone-worker Protection for individual employee safety**

- **Track access through text notifications - provides peace of mind**

- **Flexibility – stores keys, fobs and cards**

- **In-App control from your smartphone**

- **Smart Lockbox Management Portal - Fully traceable and online management**

- **Professional accredited installer service provided through VPS, with 3 years' battery life for peace of mind**

KEY BENEFITS

SAY GOODBYE TO KEY HANDOVERS

- Maximise operational efficiencies and reduce key holding costs
- Maximise revenue from time monitored response contracts – fastest responder has immediate access

REMAIN IN COMPLETE CONTROL

- Optimise asset management – track access and provide full control of Smart Lockboxes and users from a dedicated web-based portal.

BLUETOOTH ACCESS FROM A SMARTPHONE APP

The patented technology of the Smart Lockbox utilises an easy to use smartphone app*, allowing access for authorised users only and removing the code management security issue of mechanical key safes. Smartphone access is provided via Bluetooth technology using a localised Bluetooth connection.

COMPLETE ACCESS FLEXIBILITY AND CONTROL – PERSONAL PIN CODES

Authorised users can also be granted access to a Smart Lockbox via their own smartphone or one-day code.

There is no need to share codes or carry lists for individual Smart Lockbox.

Access to Smart Lockbox is fully traceable. Know who has accessed your premises, when, if they are still on site and what time they left.

One-time access codes can also be generated for single or emergency access to a Smart Lockbox, providing superior flexibility and access whenever it is needed.

GEO-FENCING TECHNOLOGY – VISIBILITY OF ON-SITE ACCESS FOR COST EFFICIENCIES

The Smart Lockbox can additionally be provided with Geo-Fencing technology. This innovative feature helps authorised users return the keys before leaving the property. Alerts are provided should the authorised user leave the geo-fenced area without completing the 'replace the key' actions on the unit. Ideal for optimisingcontractor time management.

FULLY COMPLIANT SOLUTION

As the only fully compliant key safe solution on the market the

Smart LockBox not only protects your site but also protects your liability. GDPR compliance and the highest level of physical attack resistance make this product stand out from the rest.

DEDICATED SMART LOCKBOX WEB-BASED MANAGEMENT PORTAL

Have complete auditability – set up, monitor and control access to keys for property managers, contractors and maintenance teams.

See who has visited and receive text notifications when the Smart Lockbox has been accessed.
